## Rebranding Viptela Products to Cisco

As part of the Cisco SD-WAN solution, the Viptela vBond Orchestrator, vManage NMS, and vSmart Controller have been renamed to Cisco vBond Orchestrator, Cisco vManage NMS, and Cisco vSmart Controller.

You will begin to see the new product names and the Cisco logo on the hardware, software, packaging, and in the documentation. During this transition process, you may see both Viptela and Cisco brands as well as former product names. These products meet the same high standards and quality that both Viptela and Cisco are known for in the industry.
